COLLAGEN SCIENCE – EVOLVED

Why We Love It

Supports collagen across its full lifecycle - Helps protect existing collagen, optimize its environment, and promote renewal.*

Powered by TriPlex Technology™ - A patented system combining scientifically studied Liquid BioCell® Collagen/HA Matrix® with targeted bioactives to maintain collagen performance.

More than just collagen - Life+ with zinc and biotin helps maintain the body's structure, supporting skin, joints, bones, hair and nails.

Designed for real life, every day - A convenient and delicious liquid you can take on its own or mix into your favourite beverage, making daily consistency effortless.

DIRECTIONS: Shake well before each serving. For optimal results, take 15 mL twice daily. **Refrigerate after opening and consume within 30 days.**

FAQS

What is Liquid BioCell® Life+?

Shaklee Liquid BioCell Life+ is a liquid collagen support system built on patent-pending TriPlex Technology™, which combines the scientifically studied Liquid BioCell Collagen/HA Matrix® with targeted bioactive ingredients. Life+ is formulated to work across multiple biological pathways to help protect existing collagen, stimulate the body's natural collagen renewal, and support the collagen environment.

What is TriPlex Technology™

TriPlex Technology is the patent-pending system behind Liquid BioCell Life+ that supports collagen across its complete lifecycle.* It features the scientifically studied Collagen/HA Matrix enhanced with bioactive ingredients and supported by zinc and biotin.

What Is the Collagen/HA Matrix® in Liquid BioCell Life+?

The Collagen/HA Matrix is the award-winning, patented foundation of Liquid BioCell and a key component of the TriPlex Technology found in Liquid BioCell Life+. This scientifically studied, single-source matrix remarkably mirrors human cartilage with its composition of coexisting bioactive collagen peptides, hyaluronic acid, and chondroitin sulfate to help support hydration and collagen renewal.

How Is Liquid BioCell Life+ Different from Other Liquid Collagen Supplements?

Its exclusive TriPlex Technology helps protect existing collagen, stimulate natural collagen renewal, and build a supportive environment.

- **Protect** – Helps protect existing collagen.
- **Stimulate** – Helps stimulate collagen-production, supporting the body's natural collagen renewal as production slows with age.
- **Build** – Hyaluronic acid and chondroitin sulfate help maintain the hydrated, cushioned environment while essential nutrients support the structural framework of tissue and bone.

Why Is It Important to Support the Complete Collagen Lifecycle?

With age and everyday stressors, collagen breaks down faster while the body produces less of it. A formula that supports the complete collagen lifecycle will help preserve collagen over time. Shaklee Liquid BioCell Life+ is formulated to:

- Help protect existing collagen
- Stimulate the body's natural collagen renewal processes
- Build the environment that supports collagen throughout the body.

Why Does Bioavailability Matter?

For the body to benefit from any nutrient, it must first be able to absorb and utilize it. In their natural state, collagen and hyaluronic acid are high-molecular-weight macromolecules that can limit effective absorption by the body. In Liquid BioCell Life+, our proprietary Bio-Optimized™ hydrolysis process breaks down the Collagen/HA Matrix into bioactive micropeptides of the ideal size, resulting in a delicious, easy-to-take liquid delivery format designed to support efficient absorption and utilization within the body. This is why Liquid BioCell Life+ is described as highly bioavailable.

FAQS

Is Liquid BioCell Life+ Only for Skin and Beauty?

Collagen is the most abundant protein in the human body and forms the structural framework throughout the body. For this reason, Liquid BioCell Life+ is formulated to support collagen not only in skin but also across joints and adding zinc for bones. In doing so, Liquid BioCell Life+ supports:

- Normal joint function
- Normal bones
- Hair and nails

Who Should Take Liquid BioCell Life+?

Life+ is a unique, triple-action collagen support system formulated for individuals in their 20s and beyond who want to support their body's long-term collagen health.* Collagen biology is not static; it changes with age. Natural production begins to slow while the rate of breakdown increases starting as early as your mid-20s.

Liquid BioCell Life+ is formulated for adults who want to support:

- Normal joint function
- Normal bones
- Skin's structure, firmness and hydration
- A proactive approach to ageing

What Is the Difference Between Liquid BioCell® and Life+?

Liquid BioCell delivers the multi-patented Collagen/HA Matrix® Technology that remarkably mirrors human cartilage, with bioactive collagen peptides, hyaluronic acid, and chondroitin sulfate for skin and joints.* Liquid BioCell Life+ is powered by patent-pending TriPlex Technology™, featuring that same, scientifically studied Collagen/HA Matrix® plus targeted bioactives to help protect existing collagen and stimulate natural renewal.

What Is the Difference Between Collagen-9® and Life+?

Shaklee Collagen-9 provides 10 g of collagen, including all nine essential amino acids, supplying the building blocks the body uses to produce new collagen. Shaklee Liquid BioCell Life+ is formulated to help the body use those building blocks by providing bioactive collagen peptides while additional key ingredients help support the bones, hair and nails.

Can I Take Collagen-9 and Life+ Together?

Yes. Shaklee Collagen-9 and Life+ can complement each other. Collagen-9 supplies amino acid building blocks necessary to produce new collagen, while Life+ is formulated to help the body use those building blocks to support the complete collagen lifecycle. Collagen-9 also provides vitamin C, which is required for collagen synthesis, while the biotin in both formulas supports healthy hair, skin, and nails.*

Amino acid building blocks can also come from other dietary protein sources such as Life Shake or protein-rich foods.

*This product is not intended to diagnose, treat, cure, or prevent any disease.

FAQS

How Do I Take Liquid BioCell Life+?

Take 1 tablespoon (15 mL) of Life+ twice daily, morning and evening, either on its own or mixed into a favourite beverage. Shake well before each serving and refrigerate after opening. Two 450 mL bottles of Liquid BioCell Life+ provide a month's supply. Add the two-count to your recurring monthly Loyalty Order to ensure you never run out.

Can I Use Life+ During Pregnancy or While Nursing?

Liquid BioCell Life+ has not been tested for use during pregnancy or while nursing. Anyone who is pregnant or breastfeeding and considering collagen supplementation should consult their health care professional before using Life+.

Can I Take Life+ While on Medications?

Consult a physician before using Liquid BioCell Life+ if you have a medical condition, are taking prescription medications, or have any concerns about how Life+ may affect you. A physician can help determine whether Life+ is safe for individual needs.

Is Liquid BioCell Life+ Vegan?

No, Life+ is not vegan.

Is Liquid BioCell Life+ Gluten-Free?

Gluten has not been added to the formulation, but it has not been tested as being gluten-free. If your allergy is severe, please check with your allergen specialist.

Is Liquid BioCell Life+ Kosher Certified?

No, Life+ is not kosher certified.

Is Liquid BioCell Life+ Nondairy?

Dairy has not been added to the formulation, but it has not been tested as being dairy-free. If your allergy is severe, please check with your allergen specialist.

*This product is not intended to diagnose, treat, cure, or prevent any disease.
